

Originally Developed For Harsh Australian Conditions

CUTEK® Extreme was originally developed to protect wood in extreme weather cycles and high UV ratings.

Maximizing The Service Life Of Your Wood

CUTEK® Extreme dramatically increases the dimensional stability of your wood. This, in turn, increases the service life of your project.

Extension of the service life of wood

=

Less trees cut down as their replacement

Understanding CUTEK® Colortones

CUTEK® Extreme Clear will quickly lighten/silver/gray with exposure to sunlight. To maintain a rich natural color, it is important to mix a **CUTEK® Colortone** into your oil before use. Adding a **CUTEK® Colortone** will provide UV color protection and slows the lightening/silvering process.

NOTE: CUTEK® Extreme diffuses deeply into your wood and will continue to provide moisture protection and improve dimensional stability even if a **CUTEK® Colortone** is not added.

Step 1: Prepare Restore, strip, and clean your wood

CUTEK® Wood Reviver

Restores old, weathered, or stained wood to look like new.

CUTEK® Wood Stripper

Removes paint and surface coatings from wood.

CUTEK® Quickclean

Clean your wood for a maintenance recoat.

Step 2: Protect Protect your wood in exterior settings.

CUTEK® Extreme

High performance penetrating oil works from the inside out to control moisture, and minimize warping, cupping, and splitting.

Guaranteed never to peel or flake, **CUTEK® Extreme** extends the service life and enhances the woods natural beauty.

CUTEK® Colortone

Color additive for **CUTEK® Extreme**. Adds UV color protection to **CUTEK® Extreme** that enhances, not hides, the natural beauty of your wood.

Priming & Finishing

Custom Priming

Sherwin Williams Universal Gen II Primer

Face: Prime & Sand

Back: Prime to Seal
