

About Us

Greenline Industries stands as a distinguished veneer panel manufacturer and plywood supplier. We specialize in both natural and engineered wood veneers and pride ourselves in a comprehensive range of core options. Our facilities boast extended size press capabilities with impeccable quality control and short turnaround. Our newest innovation, Elevations Custom Panels™, offers unique wood patterns to enhance any space.

We service a wide range of customers in:

- Luxury Aerospace and Marine
- Architectural Millwork and Casework
- Furniture and Cabinetry
- Hospitality
- Elevators
- Commercial Store Fronts
- Healthcare/Laboratory

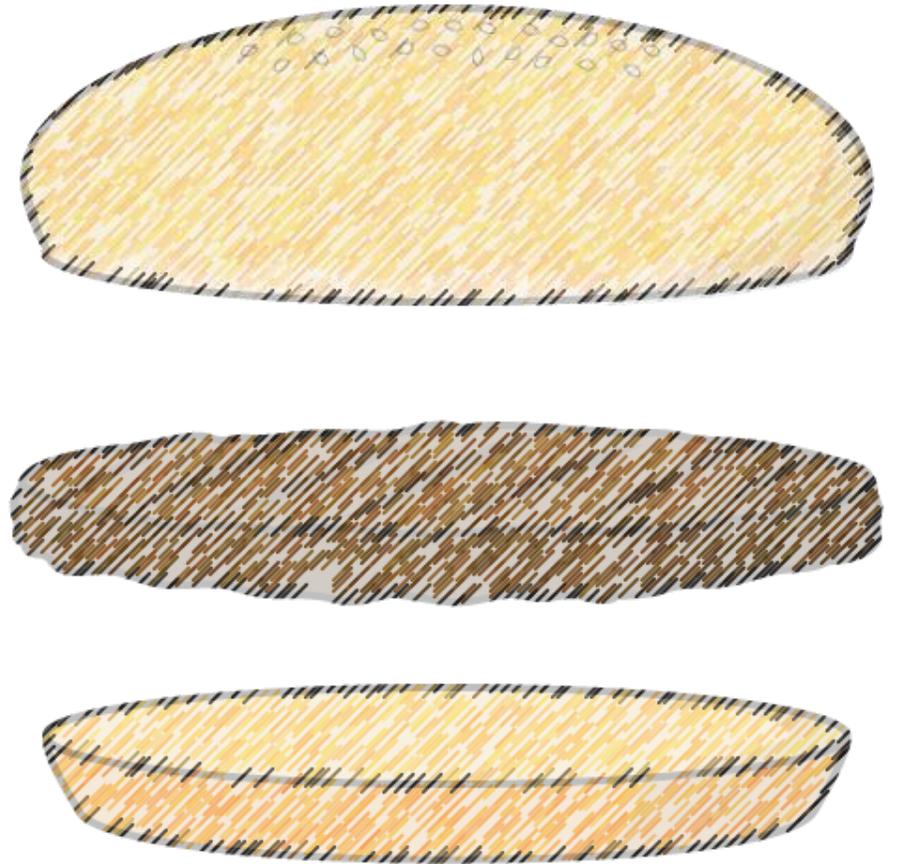

Ordering Laminated Custom Plywood = “Making Sandwiches”

Each panel requires a “Face”/“Core”/“Back” configuration.

The Face: The front surface of your panel - the first “piece of bread” - is the side that will be seen exclusively (one-sided panel) or most prominently (two-side panel) in your final project design.

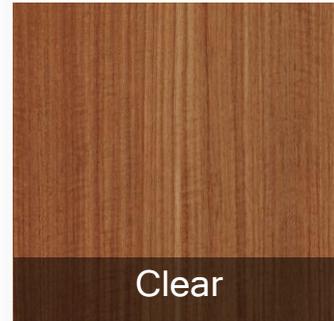

The Core: The raw substrate panel - the “meat” of your sandwich - that your veneer sheets are laminated onto.

The Backer: The second “piece of bread” in the sandwich, the surface that might or might not be seen in your completed project.

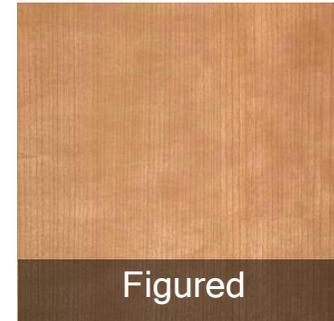

Face Options

- **Species** - Domestic and Exotic available
- **Grain** - Birdseye, Burl, Clear, Figured, Pommele, Rustic
- **Cut** - Plain Sliced (PS), Quarter (QTR), Rift, Rotary

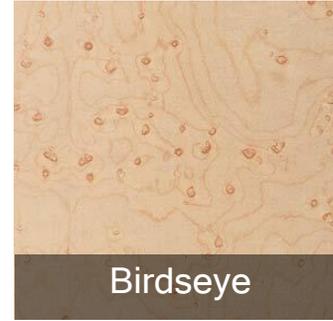

Clear

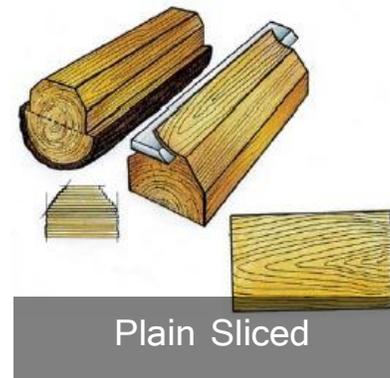

Figured

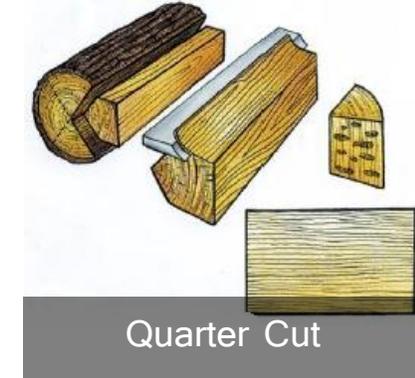

Burl

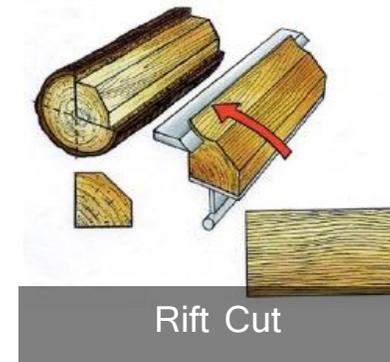

Birdseye

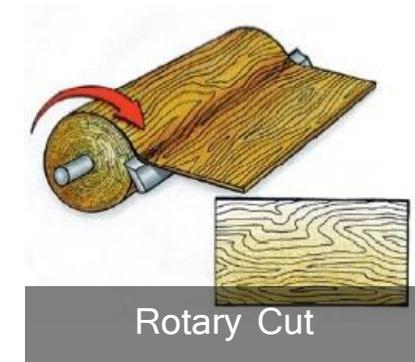

Plain Sliced

Quarter Cut

Rift Cut

Rotary Cut

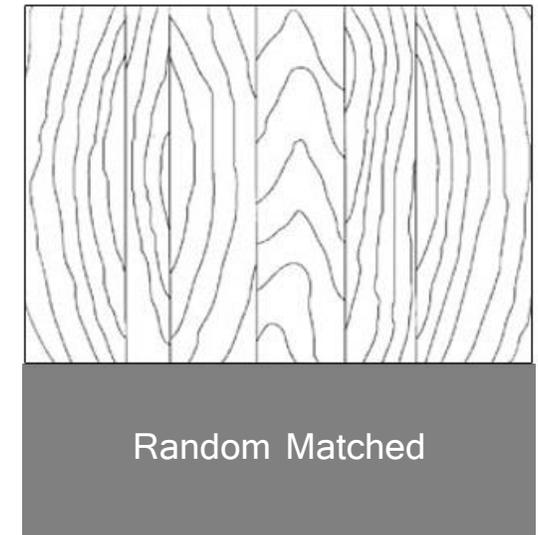

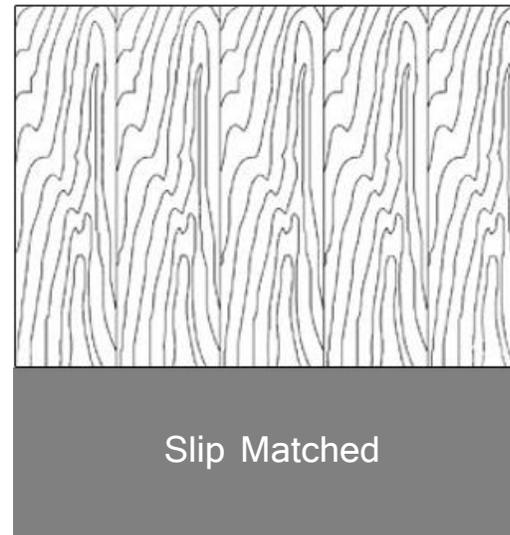

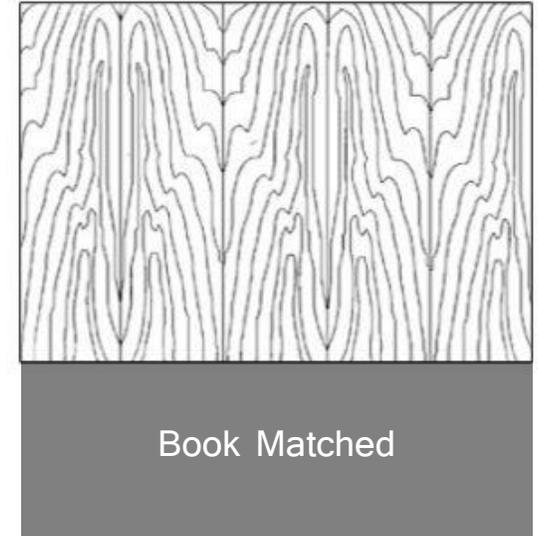

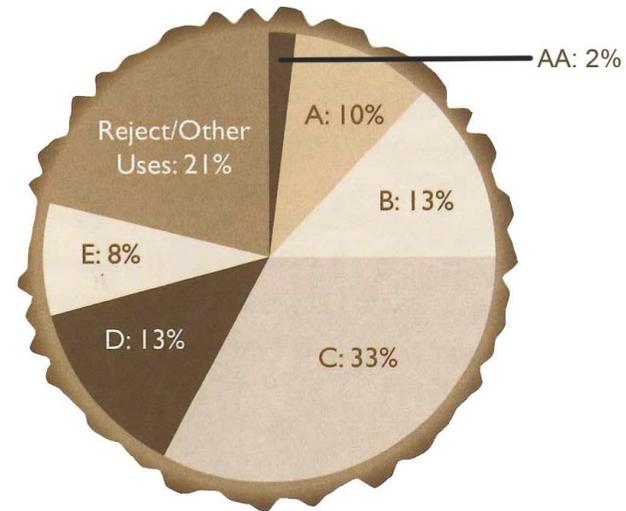

Face Options

•Grade -

- AA (architectural grade)
- A (face grade)
- B (same species, relaxed grade)
- 1 (same species, allows blemishes)
- 3/4 (any species, "mill option," relaxed grade)

•**Matching** - Book Match, Slip Match, Pleasing Match, Random Match

•**Sequencing** - Side Match (L-R), End Match, Stack Match

Plywood Core

The raw substrate material your wood veneer sheets are laminated onto to create your finished Custom Plywood.

CORE OPTIONS

✓ TYPE

MDF, Particle Board, Veneer Core, Combination Core

✓ SIZE (Standard)

4'x8', 4'x10', 4'x12' ... 5'x8', 5'x10', 5'x12'

✓ SIZE (CUSTOM)

Any cut-to-size dimension (CNC capabilities)

✓ THICKNESS

$\frac{1}{4}$ " , $\frac{1}{2}$ " , $\frac{3}{4}$ " , $\frac{5}{8}$ " , 1" , 1 $\frac{1}{8}$ " , etc., Custom

Backer

The wood veneer sheet that's laminated to the Back of the Core — whether it will be visible in your finished project, like kitchen cabinets (two-sided), or not, like wall panels (one-sided).

- Two-Sided (Match) - The exact same wood veneer sheet specs as the Face
- Two-Sided (Budget) - Same wood veneer species as the Face, but lower grade/cost specs
- One-Sided - Grade "3/4" mill option backer material
- Paper Stock Specialty types - a thin backing on the veneer sheet itself, with no core ... 10-mil, 20-mil, 2-ply (Wood on Wood)

Common Configurations

- ✓ Custom Kitchen Cabinets (A/A or A/B)
Both face and back (interior and exterior of cabinet) will be equally prominent
- ✓ Shelving or Premium Furniture (A/B or B/B)
A prominent, impactful Face and minimally visible Back. Species will match, though quality and cost don't need to.
- ✓ Premium/Architectural Wall Paneling (AA/4)
A stunningly beautiful Face for a prominent wall and a Back you'll never see once your Custom Plywood is installed.

Natural Wood Veneer Panels

Beautifully and wonderfully created, each of our natural wood veneer panels has its own distinct color and pattern that are unique to that species and log. The innate variations in color, grain structure, texture, and pattern because of the age, climate, environment, and manufacturing process make each species distinct and one of a kind.

Engineered Wood Veneer Panels

Our **IPIR** line of engineered wood veneer panels and plywood bring together state-of-the-art manufacturing technology and the best of what nature has to offer. Utilizing environmentally friendly materials from managed forests throughout the world, our IPIR engineered veneers are available in a variety of species and cuts, offering our customers endless opportunities for design. Greenline Industries is the only North American Importer of IPIR and we offer mill direct pricing. We can fill your order, whether you need a few sheets or an entire block. **Please consult our sample book for additional color options.**

Elevate your space to the next level with Elevations Custom Panels™.

Whether striking or subtle, patterns in real wood and engineered veneers provide you design flexibility to bring your vision to reality. Panels are precision cut and scaled for your application - the creative possibilities are boundless!

ABSTRACT CIRCLE

Tell a captivating story through veneers.

Our design team will bring your vision to life, even if it begins as a simple rough sketch or mood board.

Our team will guide you through the design process, offering a vision that combines diverse colors, grains, textures, and patterns to elevate your space, resulting in a sophisticated and elegantly designed atmosphere.

-Moxy Boutique Hotel

Our Elevations Custom Panels™ are versatile

Suitable for interior wall covering, furniture, wall art, and creative LOGO applications.

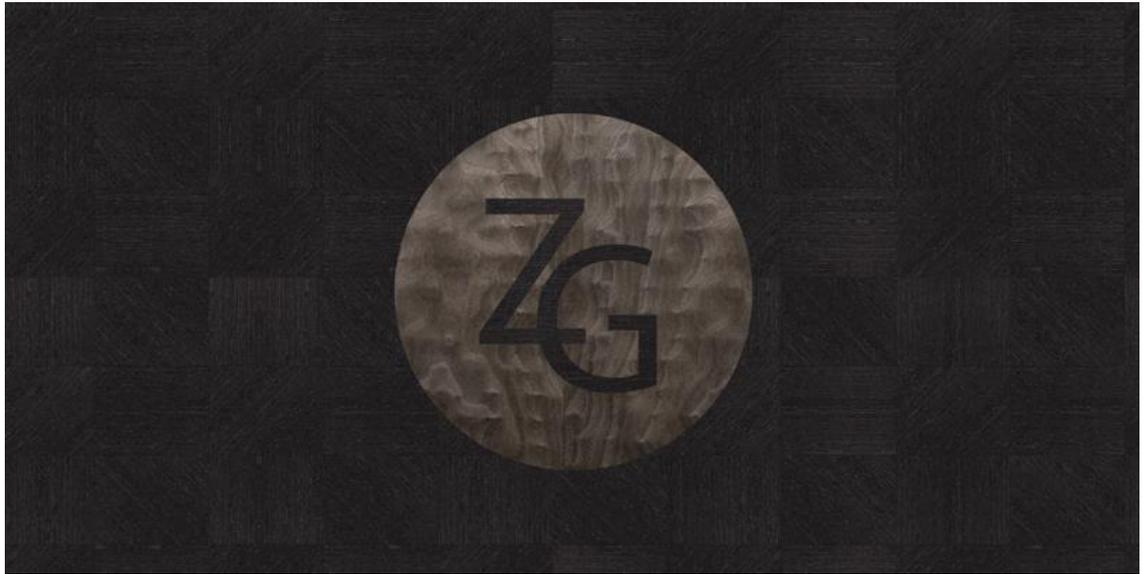

-GREENLINE INDUSTRIES LOGO

-ZAHO GLOBAL LOGO

Light Variations in Veneer Applications

Even with the same veneer, variations in brightness occur due to differing refraction caused by distinct grain directions.

Our Design Process

Define

Collecting space information such as dimensions, color scheme, etc.

Ideation

Sketching and brainstorming in different patterns.

Render

Rendering in the space.

Finalization

Finalizing the design and the order with the customer.

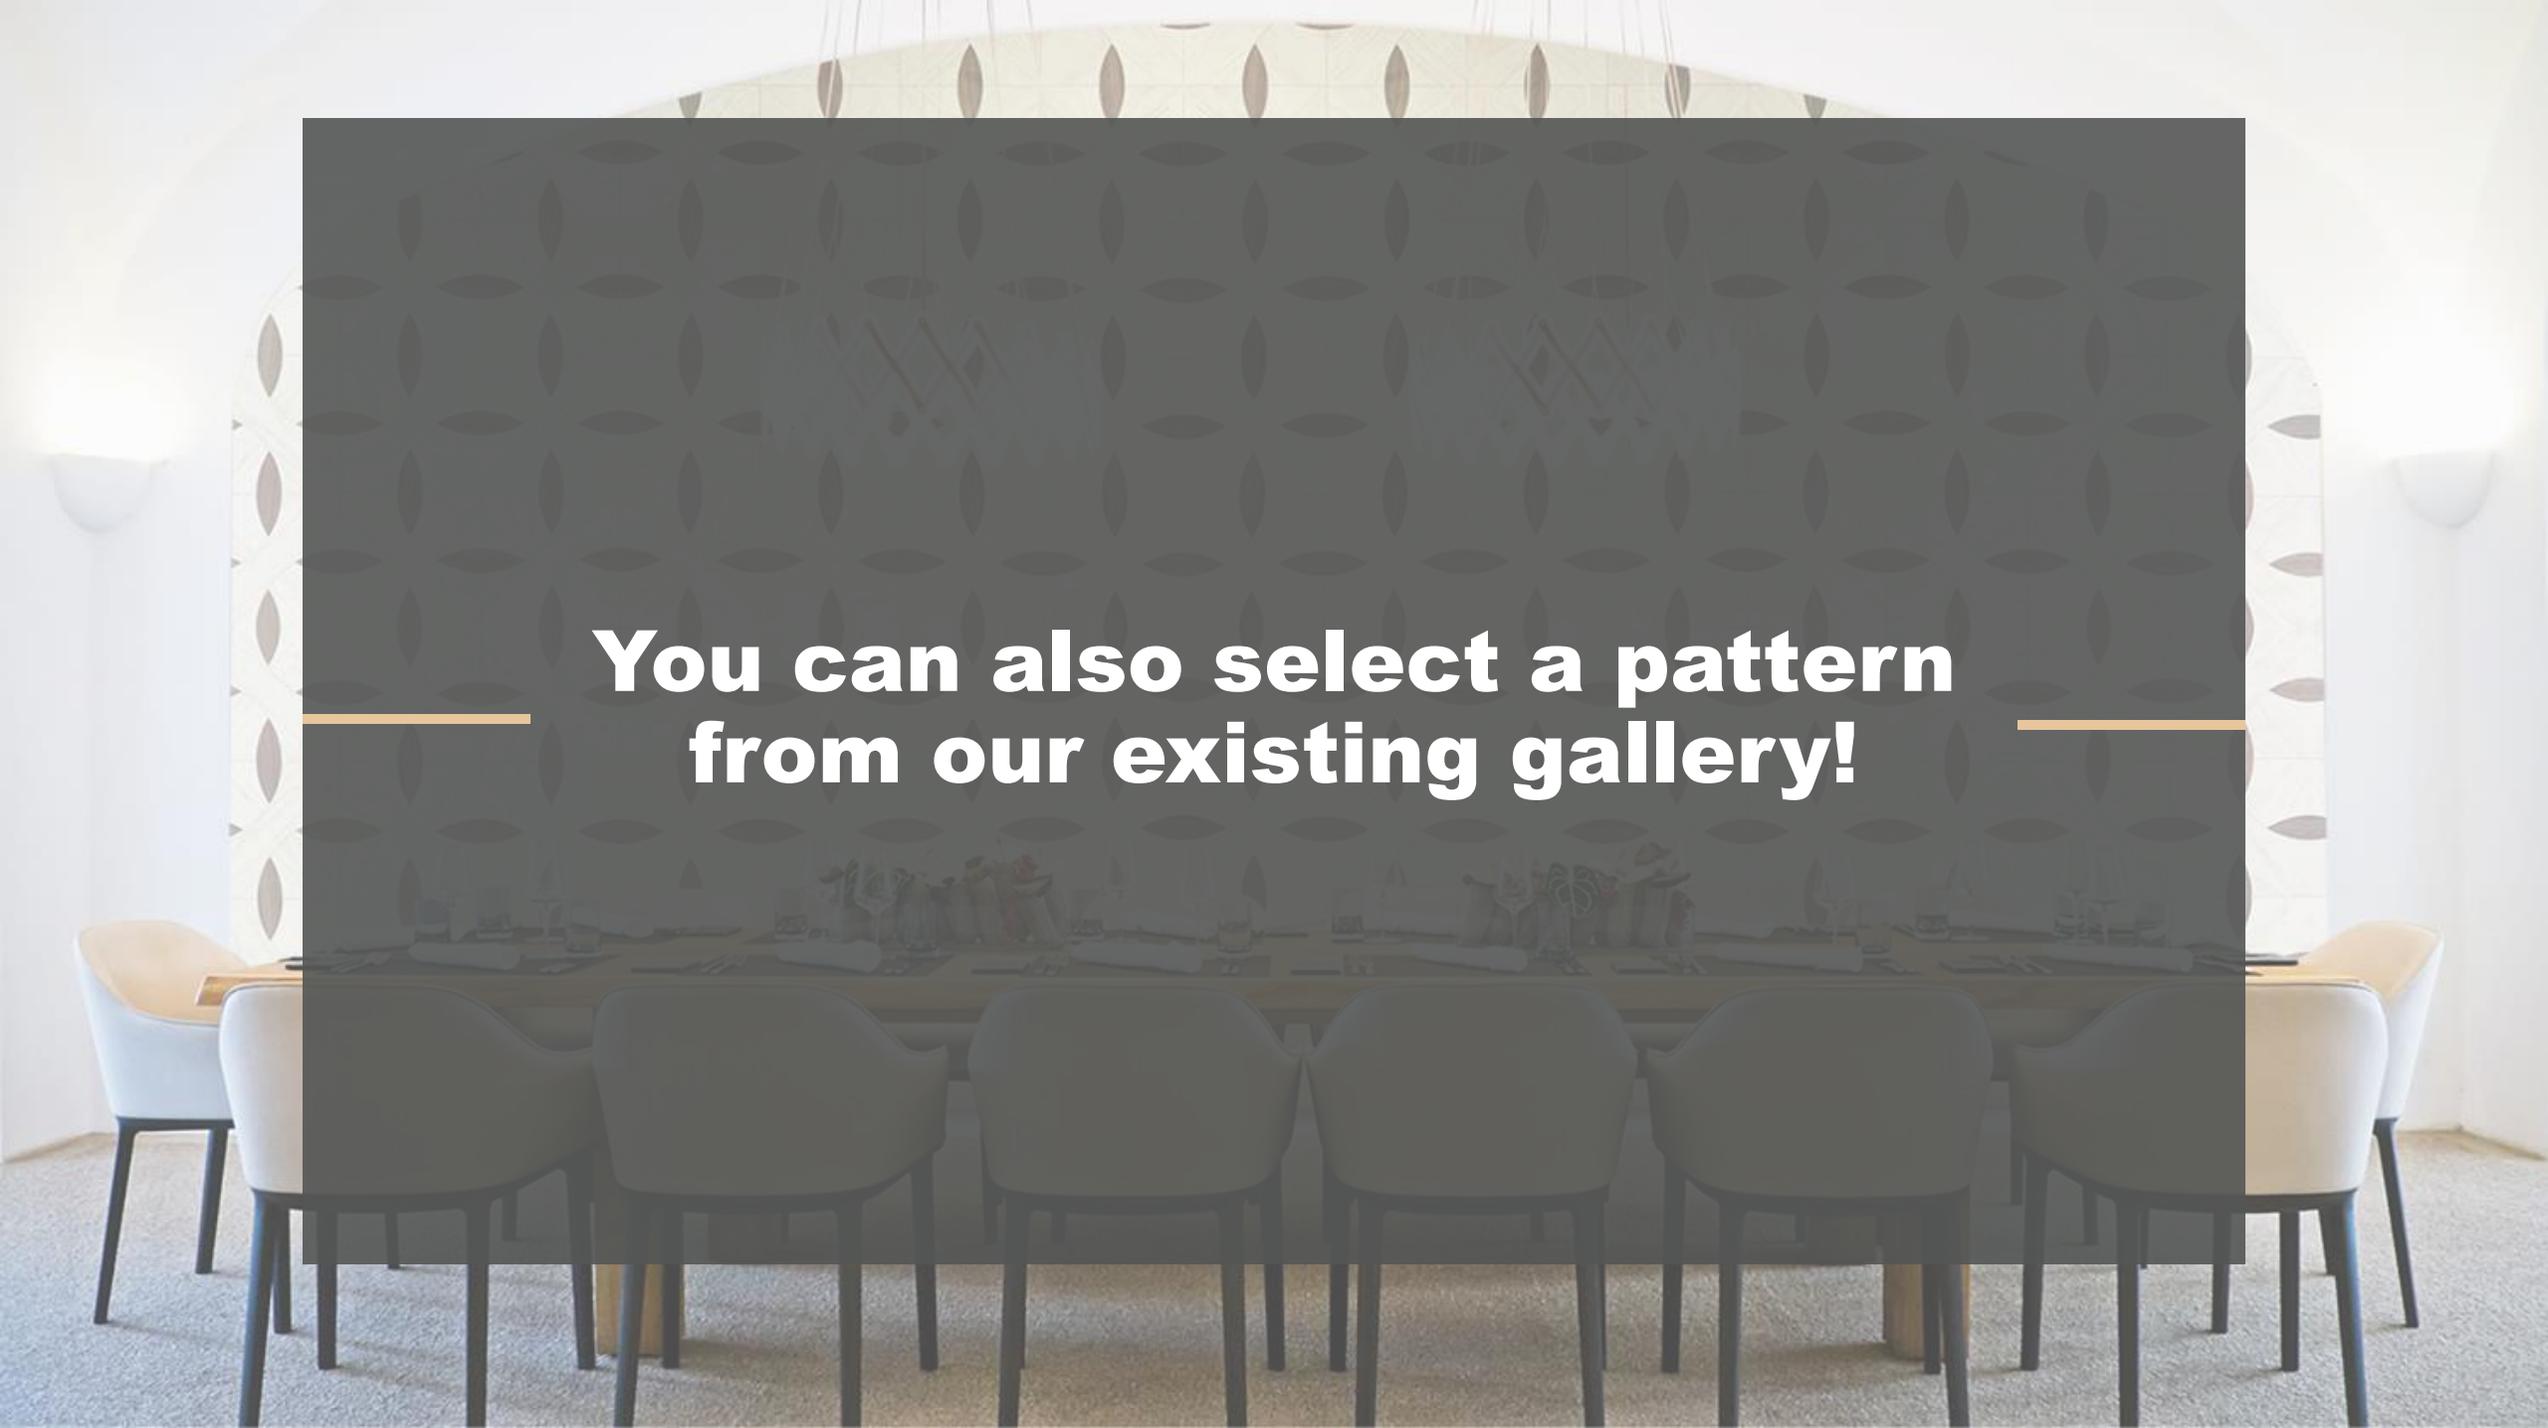

Test

Testing kerf and making the prototype.

Production

Produce, cut to size (CNC), and complete panels (ready for finish).

**You can also select a pattern
from our existing gallery!**
